

The succession plan for T. S. P. LLC is in place.

n-komm LLC (the acquirer) is committed to delivering solutions around “business continuity” and drives its considerable resources to the strengthening of the IBM i ecosystem

The long-term future of T.S.P. LLC is now assured by this business transaction retaining both the skills of the previous shareholder-managers Gerhard Schoeninger and Werner Thomé and adding new “talent” to the team supporting our customers and partners. Karlsruhe, Germany based n-komm LLC is acquiring all shares in the Waldbronn-based company, delivering both customers and partners a long-term working partner for all T.S.P.'s BUS4i (IBM i high availability) and Warehouse Management solutions.

Further, n-komm is thereby expanding its own business commitment to the IBM i systems and is specifically strengthening itself through the acquisition of an established successful specialist in infrastructure availability, in addition to platform and software solutions for retail and logistics.

The software manufacturer and managed service provider T. S. P develops and sells internationally renowned solutions for IBM i high availability, disaster recovery and monitoring, as well as a warehouse management system for customers in retail and logistics. The company also specializes in providing customized development services from the architecture layer right through to local or cloud-based operational concepts.

"T.S.P. is the perfect fit for n-komm, starting with the complementary customer and partner portfolio, the close location to n-komm headquarters in one of the most economically important regions in Europe, and the competencies in the area of IBM i software solutions," says n-komm CEO Alexander Kuehn. "In addition, the company is an ideal fit for the n-komm family in terms of its service philosophy, strategic orientation and sustainable and inclusive corporate culture. " The two previous managing directors Gerhard Schoeninger and Werner Thomé will continue to lead the company under the new group affiliation, thereby maintaining our footprint to support this success of both the new and existing customer and partner base.

The parties have agreed not to disclose the purchase price. The company is expected to join the n-komm Group on July 1, 2021.

"We are very pleased to be part of one of the most dynamic IT services groups in Europe in the future and to be able to continue the successful path of both companies together in the future," says Werner Thomé. "The merger

of the two companies means that from now on we will be able to offer our customers an even more comprehensive service portfolio with the same high quality and reliability standards our customers are used to. At the same time, being part of n-komm offers promising development potential for our employees," says Gerhard Schoeninger.

Takeover creates added value and a future for all.

Like n-komm, T. S. P.'s focus with managed services is on offering high-quality IT outsourcing services and development activities with long-term contract terms. The employees have the experience from numerous ERP, data center and cloud projects, as well as in creating and implementing migration concepts for a smooth transition from in-house operation to the use of managed services. These are the best prerequisites for the rapid integration of the development teams. In addition to its existing service portfolio, T. S. P. can now benefit from the fully compliant and certified service concept of the n-komm Group.

"The acquisition of T. S. P., (an organisation which has been operating very successfully in the market for 30 years) therefore delivers significant added value for our customers, employees and partners. As a combined team both TSP and n-komm will thrive in the provision of solutions and are proud to continue our work - offering long-term continuity in the existing business relationships and maintaining unrivalled high-quality standards for our customers. ", Alexander Kuehn added.
